

LAST MILE DELIVERY

Urban buildings are closer to customers, but property size and configuration is challenging. Mobile loading docks unload anywhere to free up dock positions and turning radius.

RETROFIT BUILDINGS

Functionally obsolete buildings and the confines of concrete are costly and time-intensive. Portable loading docks transform these buildings 5 times more quickly than construction.

PORTABLE LOADING DOCKS FUEL SHIPPING VELOCITY

DISTRIBUTION CENTERS

Dockzilla units arrive within weeks to add capacity at high-volume distribution centers. These pre-fabricated loading docks and ramps can be relocated as needed.

IN-FILL LOCATIONS

As vacant big box stores and shopping malls become fulfillment centers, loading docks are at a premium. Portable docks can help unload trailers in the parking lot or modular docks can attach to the building.

DOCKZILLA

DOCKZILLA DISTRIBUTION LINEUP

AT DOCKZILLA, WE'RE NOT INTO DOWNTIME. NO OTHER LOADING DOCK CAN DELIVER THE
1) IMMEDIACY, 2) PERFORMANCE, AND 3) FLEXIBILITY NEEDED TO GAIN TRACTION AND FUEL SHIPPING VELOCITY.

MOBILE LOADING DOCK

Brings the loading dock to incoming trailers

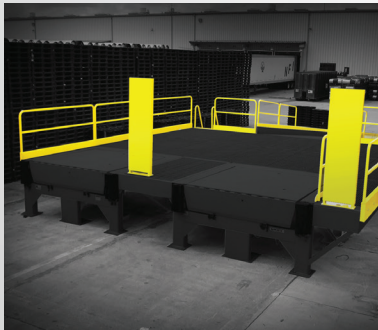

Forklifts easily engage and position these highly intuitive loading docks on wheels into place to unload trailers wherever they arrive. These mobile units can be stored when not in use.

DOCK HOUSE

Attaches to the building for undisturbed interior floor space

Integrates 4 key loading dock components in a modular design affixed to a building's exterior. Installed in 2-3 days, it delivers significant energy & thermal efficiencies - a plus for frozen food, grocery, & pharmaceutical businesses.

CROSS DOCK PLATFORM

Expedites load sorting and turnaround for last mile delivery

Self-standing dual platforms receive shipments at an inbound dock for sorting and transfer across the dock for outbound transportation. Cross docks eliminate the need for a warehouse or short-term storage for refrigerated or quick-ship products.

PORTABLE LOADING DOCK

Position anywhere for high-volume loading

The only architecturally-sound, OSHA safety-compliant loading dock that is 100% portable. Built from high-strength steel, it can manhandle high-volume loads anywhere, and relocate as business needs change.
