

WHAT IS A DOCK PIT, BESIDES A BAD IDEA?

Permits, Demolition, Structural Change, Added Risk & Wasted Floor Space

Installing a dock pit in an existing warehouse requires permits, demolition, risk of hitting embedded wiring or plumbing, structural change to building as well as time. Finding a contractor for small concrete projects is difficult and time from beginning to use can be weeks or months.

Unknown hazards can be exposed during demolition of building floor.

See electrical conduit discovered during construction.
