

DOCK HOUSE

UNTETHERED LOADING

DOCKZILLA

Modular, Expandable & Relocatable Vestibule

Dockzilla's **Dock House** is installed on the outside of the building and is easily detached and relocated, while antiquated pit-style dock levelers structurally change a facility and leave a (costly) mess in their wake.

BENEFITS OF EXTERIOR BOLT-ON DESIGN:

Installation in just one day

Saves on reclamation costs

Take your asset with you when lease ends

Quickly & easily add and expand

Similar to Front Entrance Vestibule

Commercial building designers are required to install entrance doors to create an energy-saving vestibule. Meanwhile, antiquated pit-style levelers allow massive dock doors to open without any vestibule or protection against lost energy. Dockzilla has changed this game with the Dock House leveler—a **vestibule for the back of the house**.

SAVE SPACE

Save 100 SQ FT PER DOCK POSITION

DOCKZILLA

All the work is done on the outside without disrupting internal operations or wasting valuable square footage.

VS.

ANTIQUATED PIT-STYLE DOCK LEVELER

Jack-hammering out the floor not only wastes square feet but also increases reclamation costs for leased facilities.
